### REPORT OF MANAGEMENT

### THE COMPANY

Ha Do Group Joint Stock Company ("the Company") is a joint stock company incorporated under the Law on Enterprise of Vietnam pursuant to the Enterprise Registration Certificate No. 0100283802 issued by Hanoi Department of Planning and Investment on 11 April 2005. The Company also subsequently received amended Enterprise Registration Certificates, with the latest is the 33<sup>rd</sup> amended Enterprise Registration Certificate being granted on 21 July 2025.

The Company's shares were officially listed on the Ho Chi Minh City Stock Exchange ("HOSE") from 02 February 2010 pursuant to the Decision No. 07/QD-SGDHCM signed by the Director of HOSE on 19 January 2010.

The Company's head office is located at No. 8 Lang Ha, Giang Vo Ward, Hanoi, Vietnam. The Company has two branches: the Southern branch is located at No. 60, Truong Son road, Tan Son Hoa Ward, Ho Chi Minh City, Vietnam (currently undergoing liquidation procedures); and the branch of IBIS Ha Do Hotel is located at No. 2, Hong Ha road, Tan Son Hoa Ward, Ho Chi Minh City, Vietnam.

### THE GROUP

The Company and its subsidiaries (collectively referred to as "The Group") are conducting nationwide businesses, primarily in Hanoi, Ho Chi Minh City, Khanh Hoa, Da Nang and overseas (Laos).

The current principal activities of the Company and its subsidiaries (collectively referred to as "the Group") are to invest, construct and trade real estate properties; invest, construct and trade electricity including 5 Hydropower Plant Projects, 2 Solar Power Plant Projects, 1 Wind Power Project with a total capacity of 462MW; and to conduct other businesses.

Name and logo was trademarked at The Industrial Property Office of Vietnam.

Aligning selling strategies with market demands, the Group currently has no slow-moving properties with a healthy finanical position whilst ensuring secure employment for the employees.

No. 8 Lang Ha, Giang Vo Ward, Hanoi

### RESULTS OF OPERATION

The Group's consolidated financial position and results of operations for the period from 01 Jannuary 2025 to 30 September 2025 are presented in the Group's consolidated financial statements from page 06 to page 41 enclosed herein.

Management of Ha Do Group Joint Stock Company ("the Company") is pleased to present this report and the consolidated financial statements of the Company and its subsidiaries (collectively referred to as "the Group") for the period from 01 Jannuary 2025 to 30 September 2025.

### MANAGEMENT'S RESPONSIBILITY IN RESPECT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the consolidated financial statements which give a true and fair view of the consolidated financial position of the Group, and of the consolidated results of its operations and its consolidated cash flows for the period from 01 Jannuary 2025 to 30 September 2025. In preparing those consolidated financial statements, management is required to:

- select suitable accounting policies and then apply them consistently;
- ▶ make judgements and estimates that are reasonable and prudent;
- ▶ state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- ▶ Prepare the financial statements on the basis of compliance with applicable accounting standards, accounting systems and relevant regulations; and
- ▶ prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue its business.

Management is responsible for ensuring that proper accounting records are kept which disclose, with reasonable accuracy at any time, the consolidated financial position of the Group and to ensure that the accounting records comply with the applied accounting system.

Management does hereby state that, in its opinion, the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 30 September 2025, and of the consolidated results of its operations and its consolidated cash flows for for the period from 01 Jannuary 2025 to 30 September 2025 in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to the preparation and presentation of the consolidated financial statements..

| 10  | Minh Long Sai Gon Company Joint Stock Company ("Minh Long<br>JSC")                         | Ho Chi Minh City | 99.98%          | 99.98%    |
| 11  | Ha Do - 756 Sai Gon Joint Stock Company ("756 Sai Gon JSC")                                | Ho Chi Minh City | 63.00%          | 63.00%    |
| 12  | Khanh Ha Investment Joint Stock Company ("Khanh Ha JSC")                                   | Khanh Hoa        | 70.92%          | 70.92%    |
| 13  | Ha Do Energy and Infrastructure Investment Joint Stock Company ("Ha Do Energy JSC")        | Hanoi            | 99.98%          | 99.97%    |
| 1 / | Agrita Quang Nam Energy Joint Stock Company ("Agrita Quang Nam JSC")                       | Da Nang          | 99.98%          | 97.57%    |
| 15  | Surya Prakash Vietnam Energy Company Limited ("Surya LLC")                                 | Khanh Hoa        | 100.00%         | 99.97%    |
| 16  | Ha Do Binh Thuan Company Limited ("Ha Do Binh Thuan LLC")                                  | Lam Dong         | 90.00%          | 83.23%    |
| 17  | Ha Do Thuan Nam Wind Energy One Member Company Limited ("Ha<br>Do Thuan Nam LLC")          | Khanh Hoa        | 100.00%         | 99.97%    |
| 18  | Truong Thinh Hydropower Joint Stock Company  | Quang Tri        | 50.99%          | 26.39%    |
|     |  |                  |                 |           |

### Associates

| No. | Name                                 | Adress                                 | Voting<br>right | Ownership |
|-----|--------------------------------------|--|-----------------|-----------|
| 1   | Dich Vong Complex Company<br>Limited | No. 8 Lang Ha, Giang Vo Ward,<br>Hanoi | 50.00%          | 50.00%    |

Except for Ha Do International Investment One-member Limited Liability Company established in Laos, other subsidiaries and associates were established in Vietnam.

The Group's consolidated financial statements For the period from 01 Jannuary 2025 to 30 September 2025 comprise the parent company, the subsidiaries and the Group's interest in associates.

### II. FISCAL YEAR, ACCOUNTING CURRENCY

### 1. Fiscal year

The Group's fiscal year applicable for the preparation of its consolidated financial statements starts on 1 January and ends on 31 December.

### 2. Accounting currency

The consolidated financial statements are prepared in VND which is also the Group's accounting currency.

### III. ACCOUNTING STANDARDS AND SYSTEM

### 1. Accounting system

The consolidated financial statements are prepared in accordance with Vietnamese Accounting Standards, relevant prevailing requirements under Vietnamese Enterprise Accounting System and related statutory requirements.

### 2. Compliance with accounting standards and system

The consolidated financial statements of the Company and its subsidiaries ("the Group"), which are expressed in Vietnam dong ("VND"), are prepared in accordance with Vietnamese Enterprise Accounting System and Vietnamese Accounting Standard issued by the Ministry of Finance as per:

- ▶ Decision No. 149/2001/QD-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 1);
- ▶ Decision No. 165/2002/QD-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 2);
- Decision No. 234/2003/QD-BTC dated 31 December 2003 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 3);
- Decision No. 12/2005/QD-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 4); and
- ▶ Decision No. 100/2005/QD-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 5).

### Applied accounting documentation system 3.

The Group's applied accounting documentation system is the General Journal system on Computer.

### IV. APPLIED ACCOUNTING POLICIES

### Basis of preparation 1.

Consolidated financial statements are presented using the cost method.

### Basis of consolidation 2.

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries for the period from 01 Jannuary 2025 to 30 September 2025.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continued to be consolidated until the date that such control ceases, except when the Group only obtains temporary control, and the subsidiary is acquired with a view of resale within 12 months from acquisition.

The financial statements of subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

All intra-company balances, income and expenses and unrealised gains or losses result from intra-company transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet.

Impact of change in the ownership interest of a subsidiary, without a loss of control, is recorded in undistributed earnings.

In case the Group disposes a partial interest in a subsidiary and loses control but retains an interest as an associate, the Group's investment is accounted for using the equity method of accounting. Profit/loss from this transaction is recognised in the consolidated income statement.

In case the Group disposes a partial interest in a subsidiary and loses control but retains an interest as an investment in other entities, the Group's investment is accounted for using the cost method. Profit/loss from this transaction is recognised in the consolidated income statement.

### Cash and cash equivalents 3.

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of not more than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

### 4. Inventories

### 4.1. Investment inventories

Property acquired or being constructed for sale in the ordinary course of business, rather than to be held for rental or capital appreciation, is held as inventory property and is measured at the lower of cost incurred in bringing each product to its present location and condition, and net realisable value.

### Cost includes:

- Freehold rights for land, rental land fee;
- ▶ Amounts paid to contractors for construction; and
- ▶ Borrowing costs, planning and design costs, costs of land compensation and site preparation, construction overheads and other related costs.

Net realisable value ("NRV") is the estimated selling price in the ordinary course of the business, based on market prices at the reporting date and discounted for the time value of money if material, less estimated costs to completion and the estimated costs of sale.

The cost of inventory properties sold is recognised in the consolidated income statement based on direct costs incurred in the creation of properties plus general overheads using appropriate allocation method.

### 4.2. Other inventories

The cost of inventories comprises costs of purchase, costs of conversion (including raw materials, direct labor cost, other directly related cost, manufacturing general overheads allocated based on the normal operating capacity) incurred in bringing the inventories to their present location and condition.

In case the net realizable value is lower than the original price, it must be calculated according to the net realizable value.

Net realisable value ("NRV") represents the estimated selling price in the ordinary course of business less the estimated costs to complete and the estimated costs necessary to make the sale.

For inventories belonging to the hospitality business and related services, the Group applies periodic method to record inventories. For other inventories, the Group applies perpetual method to account inventories with the value of inventories determined according to the weighted average method.

### 4.3. Provision for devaluation of inventories

An inventory provision is created for the estimated loss arising due to the impairment of value (through diminution, damage, obsolescence, etc.) of inventory properties, raw materials, finished goods, and other inventories owned by the Group, based on appropriate evidence of impairment available at the balance sheet date.

The increase or decrease in the provision for devaluation of inventories are recorded into the cost of goods sold account in the consolidated income statement.

181 100 111

### Receivables 5.

Receivables are presented in the consolidated financial statements at the carrying amounts due from customers and other debtors, after provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the balance sheet date which are doubtful of being recovered. Increases or decreases to the provision balance are recorded as general and administrative expense in the consolidated income statement.

### Tangible fixed assets 6.

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of a tangible fixed asset comprises its purchase price and any directly attributable costs of bringing the tangible fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the consolidated income statement as incurred.

When tangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

### Intangible fixed assets 7.

Intangible fixed assets are stated at cost less accumulated amortisation.

The cost of an intangible fixed asset comprises its purchase price and any directly attributable costs of preparing the intangible asset for its intended use.

Expenditures for additions, improvements are added to the carrying amount of the assets and other expenditures are charged to the consolidated income statement as incurred.

When intangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

### Leased assets 8.

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

Where the Group is the lessee

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

Assets subject to operating leases are included as the Group's investment properties in the consolidated balance sheet. Initial direct costs incurred in negotiating an operating lease are recognised in the consolidated income statement as incurred.

Lease income is recognised in the consolidated income statement on a straight-line basis over the lease term.

### 9. Depreciation and amortization

Depreciation of tangible fixed assets and amortisation of intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

| Buildings and structures  | 3 - 30 years    |
|---------------------------|-----------------|
| Machinery and equipment   | 3 - 20 years    |
| Means of transportation   | 4 - 25 years    |
| Office equipment          | 2 - 15 years    |
| Computer software         | 3 - 7 years     |
| Long-term land use right  | 25 - 47 years   |
| Indefinite land use right | No depreciation |
|                           |                 |

Useful life of other intangible fixed assets is land clearance costs of power plant projects determined based on the remaining duration of land lease contracts starting from the initiation date of commercial operation.

### 10. Investment properties

Investment properties are stated at cost, including transaction costs, less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognised is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Group.

Depreciation of investment properties is calculated on a straight-line basis over the estimated useful life of each asset as follows:

| Buildings and structures | 5 - 44 years    |
|--------------------------|-----------------|
| Machinery and equipment  | 8 - 15 years    |
| Land use right           | 44 – 50 years   |
| Long-term land use right | No depreciation |

Investment properties are derecognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the consolidated income statement in the period of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development.

Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the cost or the carrying value of the property for subsequent accounting at the date of change in use.

### 11. Borrowing costs

Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds. Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalised as explained in the following paragraph.

Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalised as explained in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset.

### 12. Prepaid expenses

Prepaid expenses are reported as short-term or long-term prepaid expenses on the consolidated balance sheet and amortised over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses.

Long-term prepaid expenses comprise land use rights, tools and supplies used and other prepaid expenses in relation to economic benefits of more than one year.

### 13. Business combinaton and goodwill

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued, and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

When issued equity instruments are constituted in the consideration of a business combination, such consideration shall include the fair value of those equity instruments as of acquisition date. In case the fair value of those equity instruments cannot be reliably measured, it can be estimated by referring to either the acquirer's fair value or the acquiree's fair value, whichever is more reliably evidenced.

In case prior to the date that control is obtained, the investment is an investment in associate or a long-term investment and the acquisition of that subsidiary is a business combination, when preparing the consolidated financial statements, the Group shall remeasure its previously held equity interests at its acquisition-date fair value and recognise the resulting gain or loss, if any, in the consolidated income statement.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the consolidated income statement.

After initial recognition, goodwill is measured at cost less any accumulated amortisation. Goodwill is amortised over 10-year period on a straight-line basis. The Group conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

Assets acquisitions and business combinations

The Group acquires subsidiaries that own real estate or other projects. At the date of acquisition, the Group considers whether the acquisition represents the acquisition of a business. The Group accounts for an acquisition as a business combination where an integrated set of activities is acquired in addition to the assets.

When the acquisition of subsidiaries does not represent a business combination, it is accounted for as an acquisition of a group of assets and liabilities. The cost of the acquisition is allocated to the assets and liabilities acquired based upon their relative fair values, and no goodwill or deferred tax is recognised. Non-controlling interests in the acquired identifiable assets and liabilities are also recognised. The acquired assets and liabilities are presented in classes of assets and liabilities with the same characteristics of the Group.

In case prior to the date that control is obtained, the investment is an investment in associate or a long-term investment and the acquisition of the subsidiary is not a business combination, when preparing the consolidated financial statements, the Group shall not remeasure the previously held equity interests. Instead, the previously held equity interests and the consideration paid were allocated to the assets and liabilities acquired based on their relative fair values on acquisition date.

Change of equity interest in existing subsidiary without loss of control When the Group acquires additional equity interest in a subsidiary, the difference between the acquisition cost and the carrying amount of the additional equity interest acquired is recorded in undistributed earnings.

When the Group partially disposes equity interest in a subsidiary without loss of control, the difference between the consideration received and the carrying amount of the equity interest transferred is recorded in undistributed earnings.

### 14. Investments

Investments in joint ventures

The Group's investment in jointly controlled entity is accounted for using the equity method of accounting. Under the equity method, the investment is carried in the consolidated balance

sheet at cost plus post joint venture changes in the Group's share of net assets of the jointly controlled entity. The consolidated income statement contains the profit/(loss) of the post-acquisition results of operation shared from jointly controlled entities to the Group.

The share of profit/(loss) of the post-acquisition results of operation of the jointly controlled entity is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend/profit sharing receivable from jointly controlled entities reduces the carrying amount of the investment.

The financial statements of the jointly controlled entities are prepared for the same reporting period and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

### Held-for-trading securities

Held-for-trading securities are stated at their acquisition costs.

Provision for held-for-trading securities and investments in entities

Provision for the investment is made when there is reliable evidence of the diminution in value of those investments at the balance sheet date.

Increases and decreases to the provision balance are recorded as finance expense in the consolidated income statement.

### Held-to-maturity investments

Held-to-maturity investments are stated at their acquisition costs. After initial recognition, held-to-maturity investments are measured at recoverable amount. Any impairment loss incurred is recognised as finance expense in the consolidated financial income statement and deducted against the value of such investments.

### 15. Payables and accruals

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

### 16. Provisions

### General provision

Provisions are recognised when the Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic

benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

When the Group expect some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated income statement net of any reimbursement.

The Group assesses onerous contracts are those contracts in which, the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfill it. The Group recognized and assessed obligations under onerous contracts as provisions and these provisions are made for each onerous contract.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance expense in consolidated income statement.

### Provision for severance pay

Provision made for severance allowance was one-month salary for each year of service until 31 December 2008 and the minumum provision for labour force equals two months worth of salary under Labour Code and relevant implementing guidance. Increases and decreases to the provision balance, except for payments to employees, are recorded as administrative expense in the consolidated income statement.

The accrued severance allowance is paid to employees upon the termination of contracts in accordance with Article 47, Labour Code.

### 17. Foreign currency transactions

Transactions in currencies other than the Group's reporting currency (VND) are recorded at the actual transaction exchange rates at transaction dates which are determined as follows:

- ► Transaction resulting in receivables are recorded at the buying exchange rates of the commercial banks designated for collection;
- ► Transactions relating to capital contributions are recorded at the buying exchange rates of the commercial banks designated for receipts of contributed capital;
- ► Transactions resulting in liabilities are recorded at the selling exchange rates of the commercial banks designated for payment; and
- ▶ Payments for assets or expenses without liabilities initially being recognised is recorded at the buying exchange rates of the commercial banks that process these payments.

At the end of the reporting period, monetary balances denominated in foreign currencies are translated at the actual exchange rates at the consolidated balance sheet date which are determined as follows:

- ▶ Monetary assets are translated at buying exchange rate of the commercial bank where the Group conducts transactions regularly; and
- ▶ Monetary liabilities are translated at selling exchange rate of the commercial bank where the Group conducts transactions regularly.

All foreign exchange differences incurred are taken to the consolidated income statement.

### Conversion of the financial statements of a foreign operation

Conversion of the financial statements of a subsidiary which maintains its accounting records in currency other than the Group's accounting currency (VND), for consolidation purpose, is as follows:

- Assets and liabilities are converted into VND using the buying and selling exchange rates, respectively, as announced by the commercial banks where the Group frequently conducts its transactions at the balance sheet date; and
- ▶ Revenues, other income and expenses are converted into VND using the actual transactional exchange rates; or the average exchange rates if the average exchange rates do not exceed +/- 2% the transactional exchange rates.

All foreign exchange differences resulting from conversion of financial statements of the subsidiary for the consolidation purpose are taken to the "foreign exchange differences reserve" on the consolidated balance sheet and charged to the consolidated income statement upon the disposal of the investment.

### 18. Appropriation of net profits

Net profit after tax (excluding negative goodwill arising from bargain purchases) is available for appropriation to shareholders after approval of Board of Directors (being approved by shareholders at the general shareholder's meeting) and after making appropriation to reserve funds in accordance with the Group's Charter and the Vietnam's regulatory requirements.

The Group maintains the following reserve funds which are appropriated from the Group's net profit as proposed by the Board of Directors and subject to approval by shareholders at the annual general meeting.

### Investment and development fund

This fund is set aside for the Group's expansion of its operation or of in-depth investment.

### Bonus and welfare fund

This fund is set aside for the purpose of pecuniary rewarding and encouraging, common benefits and improvement of the employees' benefits, and presented as a liability on the consolidated balance sheet

### 19. Advances from customers for purchasing of residential properties

Payments received from customers as down payment for the purchase of residential properties in the future that do not meet the conditions for revenue recognition, are recognised and presented as "Advances from customers" in the liability section of the consolidated balance sheet. Discounts under the sales program which is treatment as sale deductions are recognised as deductible in "Advances from customers" when the conditions for revenue recognition are unmet in the year.

Deposits from the customers for the purchase of residential properties in the future and they have not signed sales and purchase contract with the Group are recognised in Other payables in the consolidated balance sheet.

### 20. Revenue recognition

Revenue from sale of inventory property

Revenue from sale of inventory property is recognised when the significant risks and rewards of ownership of the properties have passed to the buyer, normally at the time of handover of inventory properties to the buyers.

Revenue from sale of electricity

Revenue from sale of electricity is determined based on the amounts of electricity provided via electricity power system and agreed by customers. Revenue is not recognised if there is significant uncertainty in relation to the probability of receivables collection.

Revenue from rendering of services

Revenue from hospitality services and other related services are recognised when the services are rendered to the customers and the outcome of the contract is certainly determined.

### Interest

Revenue is recognised as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

### Dividends

Income is recognised when the Group's entitlement as an investor to receive the dividend is established.

### Rental income

Rental income arising from operating leases is accounted for on a straight - line basis over the lease term.

### 21. Construction contracts

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the consolidated balance sheet date, based on actual physical accomplishments of the project. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the year in which they are incurred.

### 22. Tax

### Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are effective at the consolidated balance sheet date.

Current income tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Group to off-set current tax assets against current tax liabilities and when the Group intends to settle its current tax assets and liabilities on a net basis.

### Deferred tax

Deferred tax is provided using the liability method on temporary differences at the consolidated balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the related transaction affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporarily differences associated with investments in subsidiaries, associates and joint ventures where timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reserve in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carried forward unused tax credit and unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences, carried forward unused tax credit and unused tax losses can be utilised, except:

- where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss; and
- ▶ in respect of deductible temporarily differences associated with investments in subsidiaries, associates and joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each consolidated balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Previously unrecognised deferred tax assets are reassessed at each consolidated balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset realised or the liability is settled based on tax rates and tax laws that have been enacted at the consolidated balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on:

- ▶ either the same taxable entity; or
- ▶ When the Group intends either to settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future reporting period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

### 23. Bond issuance costs

Transaction costs relating to bond issuance are taken to the consolidated income statements on a straight-line basis over the term of the bond. Upon initial recognition, bond issue expenses are deducted against the original bond liabilities.

### 24. Earnings per share

Basic earnings per share amounts are calculated by dividing net profit/(loss) after tax for the year attributable to ordinary shareholders of the Group (after adjusting for the bonus and welfare fund) by the weighted average number of ordinary shares outstanding during the reporting period.

For reporting period from 01 January 2025 to 30 September 2025

Diluted earnings per share amounts are calculated by dividing the net profit/(loss) after tax attributable to ordinary equity holders of the Group (after adjusting for interest on the convertible bond or dividend of convertible preference shares) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

### 25. Segment information

A segment is a component determined separately by the Group which is engaged in providing products or related services (business segment) or providing products or services in a particular economic environment (geographical segment) that is subject to risks and returns that are different from those of other segments.

The business segment of the Group is mainly identified based on the sale of real estate products and goods, construction and installation services, generate and transmit electricity, leasing and other activities.

### 26. Related parties

Parties are considered to be related parties of the Group if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions, or when the Group and other party are under common control or under common significant influence. Related parties can be enterprise or individual, including close members of the family of any such individual.
